Riverside Diagnostic Center Oyster Point offers breast imaging procedures, including detailed images of breast anatomy, blood flow through the breast and diagnosis of unknown abnormalities. A breast MRI is also important in providing detailed information when a breast implant ruptures or leakage is suspected.

The [Riverside Diagnostic and Breast Imaging Center](#) is located in the Oyster Point Industrial Park and is a division of Riverside Regional Medical Center. The Center has been designated a "Breast Imaging Center of Excellence" by the Commission on Quality and Safety and the Commission on Breast Imaging.

Since all technology is located in one location, you can schedule all diagnostic procedures in one place. The professionals work closely with your physician to provide the most accurate diagnosis for planning the best treatment options.

Available are: nuclear medicine, ultrasound fine needle aspiration, ultrasound breast scanning, bone mineral densitometry, diagnostic screening mammograms and stereotactic guided breast biopsy.
