Atlantic Orthopaedics Specialists offers minimally invasive surgical procedures, if deemed appropriate, for joint pain or congenital conditions like arthritis or serious physical injury. Joint replacement services are offered by team of surgeons and physical therapists and state-of-the-art equipment.

Assessment is done before recommending surgery to replace a hip, knee, shoulder or elbow. Pain management techniques may be prescribed that include medication, physical therapy or a change in diet or exercise. If pain cannot be managed, surgery may be the next step.

There are two locations in Virginia Beach.
