The goals of the Central Virginia Chronic Fatigue Syndrome and Fibromyalgia Association, Inc., include educating persons with chronic fatigue syndrome (CFS) and fibromyalgia (FM), their family members, health care providers, and employers and providing support. In addition, the association provides a forum for dialogue among the community about research, diagnosis, and treatment.

The Association supports the patient, medical, and general communities in all areas of concern related to chronic fatigue syndrome, fibromyalgia, and related disorders. Through our print materials, website, support meetings and seminars, we strive to inform and encourage those in Central Virginia who are affected by these mysterious and often devastating illnesses.
