English

Carilion Clinic Dentistry offers the most advanced in-hospital dental care in the Roanoke Valley, including a pediatric dental program at our Children's Hospital.

Carilion Clinic offers comprehensive dental care to uninsured and under insured children and to children with medical, physical or developmental disabilities in our hospital-based outpatient clinic. Our program serves children from birth to age 21, with the goal of increasing access and improving oral health.

In partnership with the Community Based Health Care Coalition, Carilion Clinic has improved the oral health of approximately 18,000 patients through more than 48,000 visits.

This program was made possible by financial support from the Virginia Health Care Foundation, the Carilion Community Health Fund, the Maupin-Sizemore Foundation, Delta Dental of Virginia and numerous private donors.
