Chantilly Heights, formerly Arbor Terrace Fairfax offers care for individuals with Alzheimer's and other forms of dementia. Chantilly Heights provides a self-contained safe, secure environment for individuals with serious cognitive impairments.

iN2L is available. By using the iN2L interactive touch screen technology, residents are stimulated and able to pursue passions through group engagement or individual experiences to support social interaction, cognitive and physical exercise, therapy, education, reminiscing, areas of interest, memory support, and more. iN2L allows interaction using thousands of content applications.

There are numerous ways for residents to get exercise throughout the day, with outdoor walks with the help of one of our staff members or joining a group exercise class. The neighborhoods have an activity room for residents to socialize and have fun as a community.
